Invacare’s range of pressure relieving accessories have been designed to complement the Softform®, Propad® and Flo-tech® ranges.

As a combination, our Softform® mattresses and accessories offer a complete solution to effective pressure management. Designed in consultation with clinical professionals, these products are constructed from high specification materials to meet the demands of modern healthcare environments.

Invacare’s Propad® overlays, cushions and accessories range offer a high quality selection of products designed and developed to deliver exceptional support and comfort for those patients considered vulnerable or at risk of developing pressure ulcers.

Flo-tech® cushions and accessories are designed to offer a unique range of ergonomically designed pressure reducing surfaces, shaped to promote good posture and provide effective pressure reduction.

Pressure reducing wedge

The Invacare Softform Odstock Wedge was developed in partnership with clinicians to assist in the reduction of interface pressures on the sacrum and heels without significantly increasing pressure on the thighs or calves. It is designed to improve and maintain patient posture in the recumbent position, and to reduce the tendency for the client to slip down the bed, thereby reducing shearing forces on the sacrum. The Odstock Wedge is ideal for improving posture for those with back discomfort.
Reduces pressure on the heels

Clinical research has effectively demonstrated that the degree of knee flexion necessary to achieve substantial levels of pressure relief is relatively small. The Invacare Softform Odstock Wedge was designed by clinicians to reduce pressure on the heels through re-positioning the hip and elevating the knee.

High frequency welded seams
Ensures the core is protected from fluid ingress, increasing product integrity.

High quality construction
The two-way stretch cover, is waterproof and vapour-permeable. The foam core is constructed from high density foam.

Designed to be used in conjunction with the Invacare Heelpad
Used in conjunction, these two products combine to significantly reduce pressure on the vulnerable heel area.

Reduces lumbar lordosis

By tilting the pelvis, the Odstock Wedge also reduces lumbar lordosis – desirable following back surgery and ideal for improving the sleeping posture of patients with back problems.

Pressure Reducing Heelpad

The *Invacare Softform Heelpad* is designed to reduce pressure on the vulnerable heel area. The controlled volume of gel in the sacs allows pressure displacement and even weight distribution. Pressure on a patient’s heels are kept to a minimum when the heels are in contact with the gel sacs. The *Invacare Softform Heelpad* was designed to be used in conjunction with the *Invacare Odstock Wedge*, but can also be used independently as an effective pressure reducing device.
**Features and Options**

**Single and Double Heelpads available**
Single and Double formats available to meet specific patient requirements.

**Heelpads supplied with three platilon covers**
Platilon protective covers are disposable, and help to avoid contamination of the heelpad.

**Designed to be used in conjunction with the Invacare Odstock Wedge**
Used in conjunction, these two products combine to significantly reduce pressure on the vulnerable heel area.

**Technical data**

- **Softform Heelpad**
  - Width: Double: 620mm, Single: 320mm
  - Length: 480 mm
  - Height: 50 mm, 35 mm
  - Weight: 3.58 kg
  - Cleaning: 80°

Manufactured to European Standards:
Interior Foam: BS 5852: 1982 Crib 5, BSEN 597-1,2
Cover: BS 7175: 1989 Crib 5

---

**Designed to reduce pressure on the heels**

The *Invacare Softform Heelpad* enables vulnerable heels to be immersed into independent gel sacs, offering significant pressure reduction and comfort to clients.

**Enhanced combined performance**

The *Softform Heelpad* offers enhanced performance, when used in conjunction with the *Softform Odstock Wedge*, by providing improved support for the lower limbs, and pressure reduction for the heels.
Invacare® Propad™ Leg Trough

Shaped leg support - provides comfort and promotes recovery

The Invacare Propad Leg Trough has been designed in consultation with clinicians to provide maximum support for the whole leg. The Leg Trough elevates the heels and allows them to be suspended over the edge of the trough. This provides maximum pressure relief for the vulnerable heel area.
Propad® Leg Trough

Features and Options

**Provides comfort and support to promote recovery**

The leg trough offers optimum support and protection for the whole leg, reducing pressure and promoting recovery.

**Relieves pressure on vulnerable heels**

Elevates the heels and allows them to be suspended over the edge of the trough, providing pressure relief for the vulnerable heel area.

**Heavy duty water-resistant cover**

A two-way stretch, vapour permeable and anti-static polyurethane (PU) water-resistant cover.

**Cover includes a zip and is removable**

The cover can be unzipped and removed from the foam core to allow laundering of the cover.

**Adjustable side-squeeze clip buckles**

The adjustable buckles enable appropriate and comfortable positioning of the leg.

A range of versatile support pads

*Invacare Flexipads* are highly versatile pads filled with silicone gel, and can be used to position and support limbs, joints, the torso or the head.
Features and Options

**Implements positioning**

*Invacare Flexipads* can be used to position limbs for treatment, whilst recovering from an injury, or to assist in maintaining a more comfortable position to alleviate pain.

**Implements support**

Easy to use and adjust to position, *Softform Flexipads*, can provide supplementary short-term support for patients experiencing difficulty in maintaining posture.

**Single Flexipad**
Fitted with a strap for fastening to chairs, the *Invacare Flexipad* increases the surface area under elbows, arm or back.

**Double Flexipad**
Two gel sacs with a foam core – highly versatile in a number of applications, including supporting large bony prominences.

**Flexipad Ultra**
A lighter, more flexible format, available with or without straps.

The Flo-tech Back Support Range

The Invacare Flo-tech Back Support range has been designed to provide added stability to a wheelchair or standard armchair and it can be used in conjunction with any Flo-tech cushion. The Flo-tech Back Support range provides excellent comfort and improved positioning, which in turn helps to improve or maintain independence whilst in the seated position. The unique supportive design offers additional support and may provide protection from pressure ulcer formation and spinal deformities.
**A highly protective back support**

The Flo-tech Back Support provides a high degree of stability and provides improved posture resulting in enhanced protection from pressure ulcer development.

**Added support of the lumbar region**

The Flo-tech Back Support with Lumbar can be used for those who wish to have increased lateral and pelvic stability. The Visco Elastic (memory foam) Lumbar Support contours to the individual and can be easily adjusted and secured with velcro pads to accommodate a range of heights.

**Standard cover is moisture resistant**

The black towelling cover is two-way stretch, moisture-resistant and vapour-permeable, which helps to prevent a build up of shear and friction forces.

**Extendable straps**

Offers the client a securely fixed Back Support on a standard armchair or wheelchair. The straps are easy to adjust and can be fixed to a position that provides the client with the maximum comfort and support.

**Complete Care - The Flo-tech Lumbar Pad**

Designed for lumbar support, this pad provides increased lateral and pelvic stability, as well as helping to restore the natural lumbar curve.

Improving posture, comfort and support

The Invacare Flo-tech Lumbar Pad is designed for use on existing chairs or wheelchairs and can improve posture, comfort and support. The Lumbar Pad is simple and easy to use. It is fitted with adjustable straps and comes complete with a black fabric cover.
Visco Elastic (Memory) Foam

The **Lumbar Pad** is made up of two foams; Visco Elastic (Memory) foam on one side and resilient, high density foam on the other. This combination of foams provides the client with added support to the lower back. The resilient high density foam increases the support of the product whilst the Visco Elastic foam absorbs pressure from the client.

Adjustable Straps

Provides the client with improved comfort, adjustability and positioning.
